Between A 38' Boat

If you think you're looking at just another 38-foot boat, look again.

This is the new Hatteras 38 Convertible. A confident, solid performer. Its twin GM 6-71TI diesels drive the proven, sea-kindly hull to a performance level akin to a sports car. A quick sportfisherman that's eager to go to sea.

But then what else would you expect of any convertible good enough to bear the Hatteras nameplate? A Hatteras of any size is always well-planned, well-built, and well-equipped for your lifestyle.

On our new 38, that means an agile, yet stable Hatteras hull design, made of solid laid fiberglass and buttressed with all-fiberglass stringers and laterals.

It means a Hatteras made-for-action-size cockpit, outfitted with a large transom gate, a lot of built-in locker space and a ready-for-business bait and tackle center.

And it means the thoughtful interior space and accommodations typical of Hatteras, including a master stateroom big enough for a queen-size berth, two hanging lockers, and the master himself. Rest assured, a lot more comes standard on the Hatteras 38 Convertible.

There are a number of fishing convertibles from 35 to 40 feet that you might consider. But why?

There's only one Hatteras.

Compare for yourself.

To help you evaluate the real differences in a sportfisherman, send for our free checklist, "How to Buy a Sportfishing Convertible."
